

AWAYWASH

ON-BOARD CONCRETE WASHOUT SYSTEM

JONESCO

THE ENVIRONMENTAL ISSUE...

- » Concrete washout water has a highly alkaline pH
- » The release of untreated concrete washout water has the potential to contaminate the ground and surrounding watercourses
- » It is a growing requirement that concrete suppliers retain and remove the washout water if there is no provision for on-site storage and disposal
- » Inaction can result in severe financial penalties and negative press

An on-board system to retain the alkaline washout water for re-use or disposal is becoming a necessity.

THE SOLUTION...

ON-BOARD CONCRETE WASHOUT SYSTEM

AWAYWASH

- » A lightweight, polyethylene washout system, carried on the vehicle and used at the point of concrete delivery
- » The water and material in the chute are washed down into the on-board AWAYWASH containment unit
- » The unique design collects the washout and separates the coarse material from the water
- » The washout water is taken away for recycling or to an appropriate disposal point
- » The retained aggregate can be re-used or recycled

BENEFITS

OF THE AWAYWASH

ENVIRONMENTAL

- » Avoids clean-up work on site
- » Removes risk of washout water pollution
- » Re-use or recycle the washout water
- » 100% recyclable polyethylene

ECONOMICAL

- » Avoid financial penalties
- » Quantifiable return of aggregate & additives
- » Lightweight design
- » Competitive advantages

OPERATIONAL

- » Permanent on-board solution
- » Easy to use
- » No mechanical parts
- » Easy maintenance

FUNCTIONAL

- » Intuitive and uncomplicated system
- » Two sizes to fit most standard vehicles
- » Designed to last the life of the vehicle
- » Retro-fit installation possible

AWAYWASH

INSTALLATIONS

Jonesco are a leading rotational moulding manufacturer, providing innovative solutions to the commercial vehicle, spill containment, storage and fire safety sectors. Our extensive range of products is manufactured from non-corroding, UV stable and 100% recyclable polyethylene.

Our team of experienced engineers design the most robust range of products that undergo stringent tests to comply with major international regulations before they are released into the market.

With a global reputation for quality manufacturing and design, Jonesco products can be found in the most challenging and harshest of environments guaranteeing security and performance for the end user time and again.
